

Help Improve Data Interfaces for Type 1 Diabetes – Volunteers Needed!!

Researchers at the University of Michigan seek English-speaking healthcare providers (endocrinologists, nurses, physician assistants, or diabetes educators) with experience caring for patients with type 1 diabetes (T1D) and using commercially available diabetes management software systems.

- Take part in two interviews either in person or virtually over Zoom (access to a laptop with internet connection, microphone and camera is required).
- Review existing and novel data interfaces for using T1D data and provide valuable feedback to shape the future of Type 1 diabetes data analytics in clinical settings. *Interviews will be recorded.*
- Time Required: Two interviews, each lasting 60 minutes, interviews will occur over a 3 month period
- Compensation: Receive a \$25 gift card per interview, totaling \$50 if both sessions are completed
